CSM APB

CSM Worldwide, the leading provider of market intelligence and forecasting to the automotive industry, announces the April 2010 CSM Automotive Production Barometer™. Released in advance of existing sources of information, this service provides an accurate record of light vehicle production for the previous month to assist automotive economists and financial analysts in their ongoing industry evaluations.

- US light vehicle production in April 2010 increased 48.10% with 7.05 million units produced on a SAAR basis.
- North American light vehicle production in April 2010 increased 44.60% from a year ago with 11.96 million units produced on a SAAR basis, though down 0.85% from March.
- Year-to-date production is 63.30% higher than year ago levels at 11.73m units on a SAAR basis with current build rates above the full year forecast of 11.60m units.
- Production rates in the US and throughout North America are expected to remain at or near current levels as manufacturers continue to keep pace with increasing demand.

CSM Automotive Production Barometer (US and NA SAAR, units in millions)

- Supply chain could be stressed to fulfill production increases during 2010.
- Automakers building to demand levels, few overbuild scenarios currently exist.
- Increased build plans across automakers are planned in the coming months.
- Continued strength in production schedules, but rate of growth to slow.
