

CSM APB

CSM Worldwide, the leading provider of market intelligence and forecasting to the automotive industry, announces the June 2010 CSM Automotive Production Barometer™. Released in advance of existing sources of information, this service provides an accurate record of light vehicle production for the previous month to assist automotive economists and financial analysts in their ongoing industry evaluations.

- US light vehicle production in June 2010 totaled 7.47 million units produced on a SAAR, an increase of 90.00% due to the idling operations following GM and Chrysler bankruptcy filings last year.
- North American light vehicle production in June 2010 increased 89.70% from a year ago with 12.47 million units produced on a SAAR basis.
- Year-to-date production is 72.20% or 1.50m units higher than year ago at 11.95m units on a SAAR basis with current build rates above the full year forecast of 11.60m units.
- Production rates in the US and throughout North America are expected to be the highest in two years in July and moderate through the remainder of the year.

CSM Automotive Production Barometer (US and NA SAAR, units in millions)

- US autos demand outlook reduced 300,000 units to 11.50m units for 2010.
- Seasonal and market factors will moderate build rates in the second half.
- Inventory replenishment period at an end; one time restocking for re-instated GM and Chrysler dealers remains.
- Robust OEM volume planning remains intact; pressure expected in late 3Q- and for 4Q.
